## Tuesday, August 20

The Boca Raton Museum of Art continues to host totally rad exhibits. The newest one, *Carol Prusa: Dark Light*, keeps that trend going strong. It opens Tuesday and honors a selection of amazing women astronomers who have helped map the stars. A Boca Raton resident and FAU art professor, Prusa handmade each galactic-esque piece, weaving in everything from fiberglass to LED lights in select pieces. This inspiring experience should not be missed. *Opens Tuesday and on display through January 19, 2020, at Boca Raton Museum of Art, 501 Plaza Real, Boca Raton; 561-392-2500;*
